

EECE 476 Power System Distribution, Protection and Control

End of the Semester Project Spring 2026

Please Choose one of the following projects:

1. Prepare a comprehensive presentation about ETAP software and its uses in power systems analysis. Use this software tool to prepare a “Short Circuit Calculations Study” for the AUB campus.
2. Prepare a comprehensive presentation about EasyPower software and its uses in power systems analysis. Use this software tool to prepare an analysis of the Lebanese Electricity grid.
3. Report about the types and status of Protection Relays employed at the AUB for the Power Distribution Network. Is the Relay protection adequate? what is missing and what can be done to improve the situation.
4. Report about one of the EDL Power Plants in Lebanon.
5. Report about the Power distribution network and associated map of Transmission/Distribution substations (and corresponding locations) in Beirut
6. Report about the Power distribution network and associated map of Transmission/Distribution substations (and corresponding locations) in Mount Lebanon
7. Report about the Power distribution network and associated map of Transmission/Distribution substations (and corresponding locations) in North Lebanon
